Platinum markets are projected to be undersupplied in 2026, recording a fourth consecutive annual deficit.

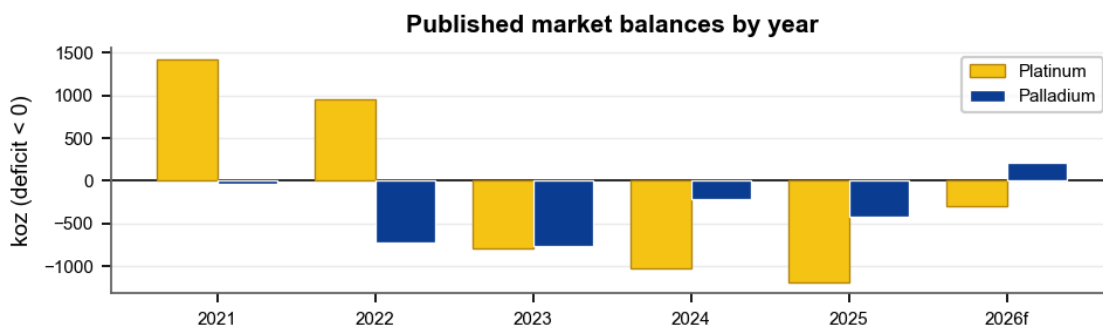

KEY FIGURES — WORLD PLATINUM INVESTMENT COUNCIL / METALS FOCUS

Metric	Value
Market balance (latest forecast, koz)	-297

HIGHLIGHTS — THE PUBLISHER'S OWN FIGURES

- However, Q1 2026 saw a market surplus as investment demand eased, initially on momentum coming out of the price rally, and later in the quarter on the Iran war driving inflation and interest rate expectations higher.
- Total platinum supply increased by 18% year-on-year to 1,736 koz during Q1 2026.
- Mine supply rose by 22% year-on-year as prior year flooding did not reoccur, while recycling increased by 7% year-on-year on higher prices.
- Total platinum demand of 1,468 koz in Q1 2026 was dragged down by 225 koz of net investment outflows.
- Consequently, the platinum market recorded a 268 koz surplus in Q1 2026 compared to a 658 koz deficit in Q1 2025.
- Platinum market to remain in deficit during 2026 .
