

Brazil Production

Brazil in world supply | XP Inc. Global Macro

Where Brazil sits in the global supply of 17 commodities, as of **Mon 31st August 2026**, and who produces its share. Brazil is the world's largest producer of niobium at 90% of global output. A page follows for each commodity, ranked as below; 15 of them carry a company-level breakdown of Brazil's own output. Country-level output is taken from the **USDA Foreign Agricultural Service PS&D** balance sheets and the **US Energy Information Administration**; metals, pulp and ethanol are compiled from the **USGS Mineral Commodity Summaries** and the relevant industry associations. Agricultural figures are marketing years, mining and energy figures calendar years, so each line states its own window.

BRAZIL'S SHARE OF WORLD PRODUCTION

Commodity	Group	Year	Brazil	World	Unit	% of world	Rank
Niobium	Metals & minerals	2024	75.00	83.00	kt	90.4%	#1
Soybeans	Agriculture	2025/26 MY	186.00	442.25	Mt	42.1%	#1
Coffee	Agriculture	2025/26 MY	71.90	189.67	m bags (60kg)	37.9%	#1
Fuel ethanol	Energy	2024	35.50	115.00	bn litres	30.9%	#2
Sugar	Agriculture	2025/26 MY	42.50	184.85	Mt	23.0%	#1
Beef & veal	Agriculture	2025/26 MY	12.37	61.56	Mt CWE	20.1%	#1
Iron ore	Metals & minerals	2024	440.00	2,500.00	Mt	17.6%	#2
Cotton	Agriculture	2025/26 MY	18.25	117.63	m bales	15.5%	#3
Wood pulp	Forestry	2024	29.00	190.00	Mt	15.3%	#2
Chicken	Agriculture	2025/26 MY	15.80	110.73	Mt	14.3%	#3
Corn	Agriculture	2025/26 MY	139.00	1,298.88	Mt	10.7%	#3
Bauxite	Metals & minerals	2024	31.00	430.00	Mt	7.2%	#4
Crude oil	Energy	2025	3.77	84.36	mb/d	4.5%	#9
Manganese	Metals & minerals	2024	620.00	20,000.00	kt	3.1%	#8
Nickel	Metals & minerals	2024	88.00	3,700.00	kt	2.4%	#9
Gold	Metals & minerals	2024	60.00	3,300.00	t	1.8%	#13
Copper	Metals & minerals	2024	400.00	23,000.00	kt	1.7%	#12

Share is Brazil's production divided by world production in the same year and unit. Rank counts every reporting country.

THE HEDGING POOL — BRAZIL'S OUTPUT IN FUTURES LOTS

Every commodity above, converted at its own contract size. Hedging all of Brazil's annual production once would take **11,278,376 lots** — about **939,865 a month**, or **44,755 a trading day**, across 12 commodities. Read it as the size of the market rather than a forecast: it assumes every tonne is hedged, on-exchange, once.

Commodity	Brazil produces	Contract	100% hedged			50% hedged			25% hedged		
			yr	mth	day	yr	mth	day	yr	mth	day
Iron ore	440.00 Mt	SCOA	4,400,000	366,667	17,460	2,200,000	183,333	8,730	1,100,000	91,667	4,365
Crude oil	3.77 mb/d	COA	1,375,834	114,653	5,460	687,917	57,326	2,730	343,958	28,663	1,365
Soybeans	186.00 Mt	S	1,366,868	113,906	5,424	683,434	56,953	2,712	341,717	28,476	1,356
Beef & veal	12.37 Mt CWE	LCA	1,196,104	99,675	4,746	598,052	49,838	2,373	299,026	24,919	1,187
Corn	139.00 Mt	C	1,094,436	91,203	4,343	547,218	45,602	2,172	273,609	22,801	1,086
Sugar	42.50 Mt	SBA	836,576	69,715	3,320	418,288	34,857	1,660	209,144	17,429	830
Chicken	15.80 Mt	C	301,886	25,157	1,198	150,943	12,579	599	75,472	6,289	299
Coffee	71.90 m bags (60kg)	KCA	253,620	21,135	1,006	126,810	10,568	503	63,405	5,284	252
Fuel ethanol	35.50 bn litres	CUAA	223,288	18,607	886	111,644	9,304	443	55,822	4,652	222
Cotton	18.25 m bales	CTA	175,200	14,600	695	87,600	7,300	348	43,800	3,650	174
Copper	400.00 kt	HGA	35,274	2,940	140	17,637	1,470	70	8,818	735	35
Gold	60.00 t	GCA	19,290	1,608	77	9,645	804	38	4,822	402	19
TOTAL			11,278,376	939,866	44,755	5,639,188	469,934	22,378	2,819,593	234,967	11,190

Units: Mt = million metric tonnes · mb/d = million barrels per day · Mt CWE = million metric tonnes, carcass-weight equivalent · m bags (60kg) = million bags of 60 kg · bn litres = billion litres · m bales = million bales · kt = thousand metric tonnes · t = metric tonnes. Tonnes are metric throughout.

A day is 252 trading days, not 365, so the daily figure is comparable with a contract's own daily volume. Where a commodity is hedged on a proxy or on its inputs, the commodity's own page says so. No listed future exists for niobium, bauxite, nickel, manganese, wood pulp, so they contribute nothing here — not zero opportunity, but opportunity that is not exchange-traded futures.

NIOBIUM — BRAZIL 90.4% OF WORLD PRODUCTION

Brazil produced **75.00 kt** of a world total of **83.00 kt** in 2024, ranking **#1** globally. Source: USGS Mineral Commodity Summaries 2025.

WHO PRODUCES IT — BY COUNTRY

We do not know how much each company produces. CBMM is private and publishes no tonnage. CFEM carries CMOC Brasil's concentrate tonnage, but the national figure is CONTAINED NIOBIUM and the conversion needs a grade we do not have, so no split is published. The producers are named below; every volume is left blank rather than estimated.

Producer	Output	% of Brazil	% of world
CBMM (Araxa)	—	—	—
CMOC Brasil / Niobras (Catalao)	—	—	—

Brazil's national total above IS sourced — it is only the split between companies that is missing. A blank means we do not know, not that the producer is small.

No listed hedge. No niobium future exists anywhere — the market is priced by bilateral contract.

SOYBEANS — BRAZIL 42.1% OF WORLD PRODUCTION

Brazil produced **186.00 Mt** of a world total of **442.25 Mt** in 2025/26 MY, ranking **#1** globally. Source: USDA FAS PS&D.

WHO PRODUCES IT — BY COUNTRY

No company breakdown for soybeans. Brazilian output here is spread across operators with no published company-level split, so a company table would be an invention rather than a measurement. The country picture above is the reliable read.

Hedging a year of output. Brazil's annual production of 186.00 Mt equates to **1,366,868 lots** of Soybeans (CBOT) (5,000 bu each), or about 113,906 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

COFFEE — BRAZIL 37.9% OF WORLD PRODUCTION

Brazil produced **71.90 m bags (60kg)** of a world total of **189.67 m bags (60kg)** in 2025/26 MY, ranking **#1** globally. Source: USDA FAS PS&D.

WHO PRODUCES IT — BY COUNTRY

We do not know how much each company produces. Ceca's monthly report - read directly, November 2024, 23 pages - breaks exports down by destination, port, state and arabica/robusta, but carries NO exporter ranking. Company-level customs data is confidential in Brazil, so this needs paid bill-of-lading data. Verified 2026-08-25. The producers are named below; every volume is left blank rather than estimated.

Producer	Output	% of Brazil	% of world
Neumann Kaffee Gruppe	—	—	—
Louis Dreyfus	—	—	—
Cooxupe (co-op)	—	—	—
Sucafina	—	—	—
Olam / ofi	—	—	—
Volcafe	—	—	—

Brazil's national total above IS sourced — it is only the split between companies that is missing. A blank means we do not know, not that the producer is small.

Hedging a year of output. Brazil's annual production of 71.90 m bags (60kg) equates to **253,620 lots** of Coffee 'C' Arabica (ICE) (37,500 lb each), or about 21,135 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

SUGAR — BRAZIL 23.0% OF WORLD PRODUCTION

Brazil produced **42.50 Mt** of a world total of **184.85 Mt** in 2025/26 MY, ranking **#1** globally. Source: USDA FAS PS&D.

Company table measures: **Cane crushed**

Data quality: **Reported**

Cane CRUSHED in the 2025/26 harvest, against Brazil's 667.58 Mt from UNICA's own sector snapshot. Only groups that publish their own crush appear. UNICAdata has no company dimension - checked directly - so the ~340 remaining mills cannot be attributed and sit in one unsourced line. Crush share is applied to Brazil's SUGAR output to size the hedge, which assumes a group's sugar/ethanol mix matches the national mix; it does not exactly.

WHO PRODUCES IT — BY COUNTRY

WHO PRODUCES BRAZIL'S SHARE

Company	Mt cane	% of Brazil	% of world	Hedge lots	Listing
Raizen (Cosan / Shell)	70.50	10.6	2.43	88,342	RAIZ4 BZ
Sao Martinho	21.70	3.2	0.75	27,189	SMTO3 BZ
Adecoagro	12.10	1.8	0.42	15,142	AGRO US
Not sourced	563.28	84.4	19.40		—

Cane processed — each group splits it between sugar and ethanol. 2025/26 figures, compiled from Company reports read directly; national crush from UNICA (2026-08-25). % of world chains each company's share of Brazil through Brazil's share of world supply.

Hedging a year of output. Brazil's annual production of 42.50 Mt equates to **836,576 lots** of Sugar No.11 (ICE) (112,000 lb each), or about 69,715 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

BEEF & VEAL — BRAZIL 20.1% OF WORLD PRODUCTION

Brazil produced **12.37 Mt CWE** of a world total of **61.56 Mt CWE** in 2025/26 MY, ranking **#1** globally.
Source: USDA FAS PS&D.

WHO PRODUCES IT — BY COUNTRY

We do not know how much each company produces. The processors publish capacity and tonnes SOLD, not carcass-weight slaughter. JBS's 20-F gives facility counts and daily head capacity; the national figure is 12.37 Mt CWE from IBGE. Those do not reconcile without assuming a yield and a utilisation rate, which would be inventing two numbers to produce a third. Verified 2026-08-25. The producers are named below; every volume is left blank rather than estimated.

Producer	Output	% of Brazil	% of world
JBS (Friboi)	—	—	—
Marfrig	—	—	—
Minerva Foods	—	—	—
Frigol	—	—	—
Masterboi	—	—	—
Mataboi (three processors)	—	—	—

Brazil's national total above IS sourced — it is only the split between companies that is missing. A blank means we do not know, not that the producer is small.

Hedging a year of output. Brazil's annual production of 12.37 Mt CWE equates to **1,196,104 lots** of Live Cattle (CME) (40,000 lb each), or about 99,675 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. **This is a cross hedge.** CME cattle settle against US liveweight, not Brazilian carcass beef. Carcass weight is grossed to liveweight at a 57% dressing yield. A directional proxy only — the basis is large. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

CHICKEN — BRAZIL 14.3% OF WORLD PRODUCTION

Brazil produced **15.80 Mt** of a world total of **110.73 Mt** in 2025/26 MY, ranking **#3** globally. Source: USDA FAS PS&D.

WHO PRODUCES IT — BY COUNTRY

We do not know how much each company produces. Same basis problem as beef: BRF and JBS Seara report volumes sold in tonnes of product, while the national figure is bird output. Marfrig and BRF merged into MBRF during 2025, so the 2024 entities no longer file separately either. Verified 2026-08-25. The producers are named below; every volume is left blank rather than estimated.

Producer	Output	% of Brazil	% of world
BRF (Sadia / Perdigao)	—	—	—
JBS (Seara)	—	—	—
Aurora Coop	—	—	—
C.Vale	—	—	—
Copacol	—	—	—

Brazil's national total above IS sourced — it is only the split between companies that is missing. A blank means we do not know, not that the producer is small.

Hedging a year of output. Brazil's annual production of 15.80 Mt equates to **301,886 lots** of Corn (CBOT) + Soybean Meal (CBOT) (0 each), or about 25,157 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. **This is a cross hedge.** No poultry future exists. Integrators hedge the INPUT — corn and soybean meal are the bulk of the cost of a bird — so their brokerage sits in the feed grains, not in the meat. Assumes 2.33t of feed per tonne of meat (75% dressing, 1.75 feed-conversion ratio), a ration of 62% corn / 30% soybean meal. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

3R Potiguar	18.85	0.5	0.02	7,292	—
3R Petroleum	17.52	0.5	0.02	6,742	—
Prio Bravo	15.93	0.5	0.02	6,191	—
3R Petroleum Off	14.57	0.4	0.02	5,641	—
Other (49 smaller operators)	117.54	3.3	0.15	45,403	—

Output the company OPERATES — not its equity share. An operator runs fields in which others hold interests. 2023 figures, compiled from ANP — Produção de petróleo e gás natural por poço (open data). % of world chains each company's share of Brazil through Brazil's share of world supply.

Hedging a year of output. Brazil's annual production of 3.77 mb/d equates to **1,375,834 lots** of Brent Crude (ICE) (1,000 bbl each), or about 114,653 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. Brazilian grades price against Brent; the differential is left unhedged. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

MANGANESE — BRAZIL 3.1% OF WORLD PRODUCTION

Brazil produced **620.00 kt** of a world total of **20,000.00 kt** in 2024, ranking **#8** globally. Source: USGS Mineral Commodity Summaries 2025.

WHO PRODUCES IT — BY COUNTRY

No company breakdown for manganese. Brazilian output here is spread across operators with no published company-level split, so a company table would be an invention rather than a measurement. The country picture above is the reliable read.

No listed hedge. No liquid manganese future.

NICKEL — BRAZIL 2.4% OF WORLD PRODUCTION

Brazil produced **88.00 kt** of a world total of **3,700.00 kt** in 2024, ranking **#9** globally. Source: USGS Mineral Commodity Summaries 2025.

Company table measures: **Production**

Data quality: **Reported**

Table totals **61%** of the national figure

CONTAINED nickel, the same basis as the national figure. Anglo American's entire nickel business was Brazilian (Barro Alto and Codemin) and was sold to MMG during 2025, so the 2024 figure is Anglo's. Atlantic Nickel's Santa Rita is privately held and publishes no volume, which is most of the gap below.

WHO PRODUCES IT — BY COUNTRY

WHO PRODUCES BRAZIL'S SHARE

Company	kt	% of Brazil	% of world	Listing
Anglo American	39.40	44.8	1.06	AAL LN
Vale	14.00	15.9	0.38	VALE3 BZ
Not sourced	34.60	39.3	0.94	—

Output the company itself produced. 2024 figures, compiled from Company annual filings and results releases, read directly (2026-08-25). % of world chains each company's share of Brazil through Brazil's share of world supply.

No listed hedge. Nickel hedges on the LME, which this book does not currently carry.

GOLD — BRAZIL 1.8% OF WORLD PRODUCTION

Brazil produced **60.00 t** of a world total of **3,300.00 t** in 2024, ranking **#13** globally. Source: USGS Mineral Commodity Summaries 2025.

WHO PRODUCES IT — BY COUNTRY

We do not know how much each company produces. CFEM carries per-filer gold, but its unit field cannot be trusted for this substance: filers declare ore tonnage under a gram unit, so the declared quantities sum to roughly a thousand times world production. Separating metal from ore would need an assumed gold price and royalty rate - modelling, not sourcing. Artisanal (garimpo) output is in any case not reliably measured by anyone. The producers are named below; every volume is left blank rather than estimated.

Producer	Output	% of Brazil	% of world
Kinross (Paracatu)	—	—	—
AngloGold Ashanti	—	—	—
Equinox Gold	—	—	—
Aura Minerals (Almas)	—	—	—
Apoena)	—	—	—
Serabi Gold (Palito)	—	—	—
Coringa)	—	—	—
Jaguar Mining (Turmalina)	—	—	—
Caete)	—	—	—

Brazil's national total above IS sourced — it is only the split between companies that is missing. A blank means we do not know, not that the producer is small.

Hedging a year of output. Brazil's annual production of 60.00 t equates to **19,290 lots** of Gold (COMEX) (100 troy oz each), or about 1,608 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

COPPER — BRAZIL 1.7% OF WORLD PRODUCTION

Brazil produced **400.00 kt** of a world total of **23,000.00 kt** in 2024, ranking **#12** globally. Source: USGS Mineral Commodity Summaries 2025.

Company table measures: **Production**

Data quality: **Reported**

Table totals **87%** of the national figure

CONTAINED copper, the same basis as the national figure. Brazilian operations only: Vale's Canadian and Indonesian output is excluded, as is Ero's gold. ANM's CFEM returns cannot supply this - they declare ore and concentrate tonnage, and converting that to contained metal needs a per-mine grade.

WHO PRODUCES IT — BY COUNTRY

WHO PRODUCES BRAZIL'S SHARE

Company	kt	% of Brazil	% of world	Hedge lots	Listing
Vale	265.20	66.3	1.15	23,387	VALE3 BZ
Lundin Mining	43.26	10.8	0.19	3,817	LUN CN
Ero Copper	40.60	10.2	0.18	3,580	ERO CN
Not sourced	50.94	12.7	0.22		—

Output the company itself produced. 2024 figures, compiled from Company annual filings and results releases, read directly (2026-08-25). % of world chains each company's share of Brazil through Brazil's share of world supply.

Hedging a year of output. Brazil's annual production of 400.00 kt equates to **35,274 lots** of Copper (COMEX) (25,000 lb each), or about 2,939 per month across a 12-month strip. Each producer's lots above are its share of Brazil applied to that national figure. This is the size of a full hedge of a whole year: a producer would hedge a fraction, roll a strip, and still carry quality, location and timing basis that flat price does not cover.

APPENDIX — HEDGE SIZING BY COMPANY AND PRODUCT

Every named Brazilian producer, split by product, with the number of futures lots a hedge of that year's output would require at four hedge ratios — each shown per year, per month and per trading day (252 days). 33 companies. A company that makes several things appears once per product, because each is a different contract. Lots are the company's share of Brazil applied to Brazil's national output, converted at each contract's size.

Company	Product	Annual production	Contract yr	100%			75%			50%			25%

Blank lot columns mean the product has **no listed future** — pulp, niobium, nickel, manganese and bauxite — not that the producer was overlooked. A qualifier in brackets says what the share measures: *exports* for the trade houses, *share by processing* for the meat packers, *equity share* for the oil partners. Poultry has no meat contract, so the integrators are sized on their feed hedge (corn + soybean meal). These are the lots a full hedge would require, not a forecast of what any producer will trade.

Production figures are compiled by the internal Strategy Monitor from published public sources: USDA FAS PS&D, the US Energy Information Administration, the USGS Mineral Commodity Summaries and the relevant industry associations. Company-level splits are compiled from company production reports and sector bodies and were last reviewed on 2026-08-21; where a table is marked a desk estimate it is an approximation, not a reported figure. Each table states what it measures — production, equity share, cane crushed, processing or exports — and these are not interchangeable. Figures are descriptive only and are not a forecast of future output.
